## What does Mackin offer members of Montana Cooperative Services LLC?

As a distributor for the leading educational publishers, we offer the **newest and most progressive eBooks, databases and online learning resources available on [Mackin.com](http://Mackin.com)**.

We have partnered with these publishers to provide the finest **content that aligns with standards** to help teachers and students engage, explore, and utilize digital resources in support of today's curriculums.

Digital eBooks , interactive eBooks and databases can make learning fun and exciting, while reinforcing topics and subjects introduced in class or at the media center. Mackin has numerous unlimited, simultaneous access licensed eBooks, in addition to single-user eBooks. With the additional discount provided through the MCS / AEPA contract, this means that your school's educational budgets are well-spent and provide access at school, home or on the go.

Many eBooks and databases are now designed for use on mobile devices and desktop computers making them available 24/7 and accessible on school issued devices or BYOD.

### MACKIN VIA™

With over 100,000 eBooks available through Mackin, you could conceivably have a full page of login and passwords to all of the individual resources from numerous publishers. To alleviate "password management", we have developed [MackinVIA™](http://MackinVIA™) -- a proprietary e-Content Management system.

MackinVIA is a single access portal to all of your digital resources by using a single login and password. VIA is a free value-added service for our digital customers.

Access to eBooks in VIA can be done through a link on your library page, through your MARC records or directly with the use of the login and password. Once logged in to VIA, you can search using numerous options, view customized groups of resources or browse using the categories feature. VIA Administrators can design the homepage of VIA for their school and generate usage statistics reports on demand too!

MackinVIA Apps are available for iPad, iPhone, iPod Touch, Android tablets and phones, Kindle, and Nook.
