

## **Food Product Supplier RFP: MCS #21-01 – Written Questions**

### **Written question from Lewis Hughen of US Foods:**

Are we able to add columns to list the brand and product information?

**5.1.7 Brand & Product Code Number:** List product brand regardless if a brand is specified and the product code number.

### **MCS's Response to written question:**

In order to provide a different Brand and corresponding Product Code Number per 5.1.7 on the Appendix "C" Market Basket Worksheet (1<sup>st</sup> tab in the provided excel spreadsheet), MCS has revised the spreadsheet adding columns with "Product Brand" and "Product Code Number". If responders have already begun utilizing the previously provided spreadsheet and want to continue using it, then they need to insert two columns between Column E - "Vendor Code (or Equivalent)" and Column F - "Pack". Label the first additional column (now F) "Product Brand" and the second additional column (now G) "Product Code Number".
